Profile

Information Technology Engineering student at Damascus University (Class of 2026), specializing in backend development with Laravel and Odoo ERP customization. Hands-on experience building full-stack web applications applying Design Patterns, Clean Code, and SOLID principles. Skilled in developing custom Odoo modules using Python ORM, XML/QWeb, and REST API controllers. Seeking an internship or entry-level position to expand my expertise and contribute to real-world projects.

Education

Bachelor's Degree in Information Technology Engineering at Damascus University, Damascus, Syria

September 2020 - August 2026

Grade: 70%

Faculty of Information Technology Engineering. Relevant coursework: Software Engineering, Database Systems, Web Development, Distributed Systems, ERP Systems. Graduation Project: Smart Mobile Hospital ERP System built on Odoo 19 with custom Python module development and IoT integration.

Vocational Secondary Certificate at Vocational Secondary School - Artouz, Artouz, Rif Dimashq, Syria

September 2017 - June 2020

Vocational secondary education with focus on Information Technology fundamentals, computer basics, and introductory programming concepts.

-  Vocational Secondary Certificate in Information Technology

Experience

Odoo ERP Developer (Graduation Project) at Smart Mobile Hospital ERP System, Damascus, Syria

June 2026 - August 2026

- Designed and implemented a full ERP solution on Odoo 19 for a Smart Mobile Hospital network.
- Built a custom Odoo module (`smart_hospital_pulse`) from scratch using Python ORM and XML/QWeb.
- Developed REST API Controllers with `@http.route` for IoT heart-rate monitoring integration.
- Implemented RBAC security, fleet & biomedical asset management, and pharmaceutical supply chain.
- Executed 3-Way Matching (PO → Receipt → Vendor Bill) with Lot/Expiration tracking.
- Repurposed CRM as a Tele-Triage pipeline and managed Calendar rosters with double-booking prevention.
- Configured Point of Sale for offline field dispensing and Online Jobs for crisis recruitment.
- Tested IoT simulation via Postman; automated Chatter alerts using `message_post()`.

Backend Laravel Developer at Mad Solution Online, Remote

April 2022 - May 2022

- Developed backend features using Laravel PHP, MVC architecture, and Eloquent ORM.
- Implemented Controllers, Routing, Middleware, and Validation for web applications.
- Worked on database design and backend logic for production web systems.

Skills

Backend:: Laravel, PHP, Python, Java, C#, REST API, Docker, Odoo 19 (Python ORM, XML/QWeb)

Databases:: MySQL, SQL, SQLite, Oracle, Redis, Eloquent ORM, PostgreSQL

Frontend:: Vue.js, Bootstrap, HTML/CSS, JavaScript

Software Engineering:: Design Patterns (Factory, Observer, State, Repository, Strategy, Chain, Composite, Adapter, Facade), Clean Code, SOLID, OOP, MVC, Problem Solving, Compiler Design (ANTLR)

Tools & Technologies:: Jira (Agile/Scrum), Apidog, Postman, Git/GitHub, VS Code, Laragon, Docker

Data Engineering:: Python (Pandas), SQL Advanced (Window Functions, CTEs), ETL Pipelines, SQLite

Security & Performance:: Authentication/Authorization, Middleware, OTP, Caching (Redis), Eager Loading, Logging & Monitoring

Projects

Smart Mobile Hospital ERP System (Odoo 19)

June 2026 - August 2026

Custom Odoo module development (Python + XML), IoT integration via REST API, Fleet/Inventory/Purchase/Maintenance/CRM/PoS.

Banking System (Laravel)

January 2026 - March 2026

Built a complete banking system applying Design Patterns (Factory, Observer, State, Repository, Strategy, Chain of Responsibility). Enhanced performance with Redis caching and pagination.

Government Complaints System (Laravel)

February 2026 - April 2026

Developed a complaint management system following Clean Code, SOLID principles, advanced security (OTP, Auth), caching, eager loading, audit history, logging, and backup.

Crypto Puzzle (Java)

January 2025 - February 2025

Designed an interactive puzzle game using 2D arrays for matching numbers and generating random rewards.

Secret Number Game (Java)

January 2025 - February 2025

Built a number guessing game with a special admin protection mode.

Personal Portfolio Website • [github](#)

Built and deployed a personal portfolio showcasing projects and skills.

Animal Association Management System (Laravel)

May 2025 - August 2025

Comprehensive platform for an animal shelter, managing adoptions, donations, departments, and user roles (Admin, Veterinarians, Volunteers).

Data Engineering Pipeline (Python)

September 2026 - October 2026

End-to-end data pipeline for restaurant data analysis using Python OOP, Pandas, SQLite, and advanced SQL (Window Functions, CTEs). Includes 244+ transactions and 3+ ETL stages.

Oracle Database Expertise

May 2025 - June 2025

Hands-on experience in Oracle Database: Users/Roles/Permissions (GRANT), Tablespace, Triggers, Stored Procedures, Materialized Views, Audit Logs, Partitioning, Star Schema Data Warehouse, and Query Optimization.

Languages

Arabic - Native

English - Conversational

Certificates

Bachelor's Degree in Information Technology Engineering from Damascus University

August 2026

Bachelor's Degree in Information Technology Engineering - Software Engineering track. Graduated with a GPA of 70%.

Vocational Secondary Certificate from Vocational Secondary School - Artouz

June 2020
